

*Your
Impact*
2017

Auckland Medical
Research Foundation
est. 1955

Thank you

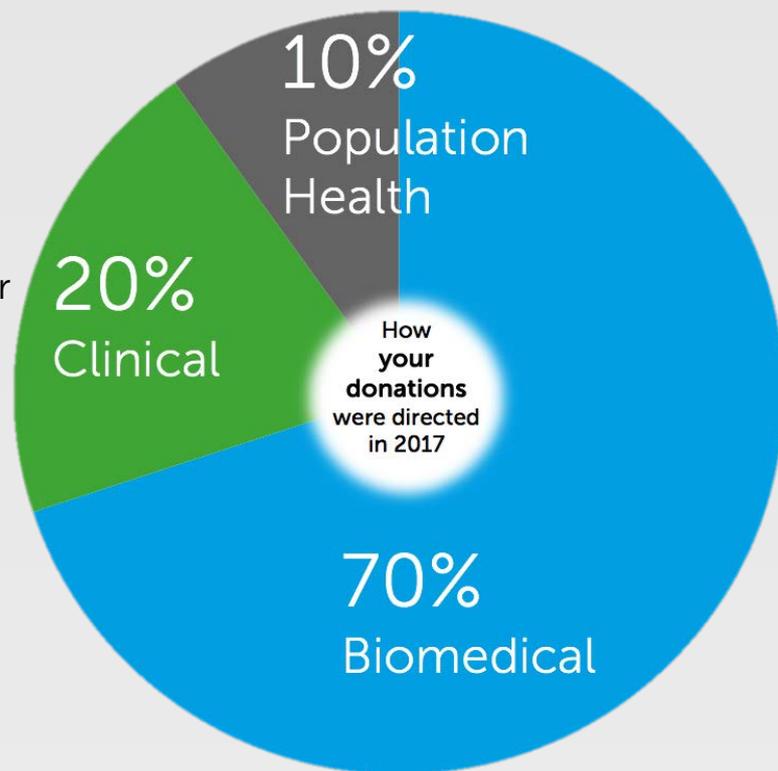

**Jeff Todd,
outgoing
President**

"You can take great pride knowing that your gifts are responsibly stewarded, according to your wishes. For future researchers or immediate impact, 100% of your donation supports research. Always."

**Sue Brewster,
Executive
Director**

"Our generous donors know they can make a real difference through AMRF. We are grateful for your commitment to supporting research, and the results you achieve every day."

100%
of your donation
directly supports
*Medical
Research*

**Associate Professor
Sarah Hetrick**

Recipient of the
Douglas Goodfellow
Repatriation Fellowship,
Awarded in 2017

"This fellowship is so important because it has allowed me to come home and use my skills to help youth at-risk here in New Zealand."

Members and friends, your continued support and donations have helped to make this one of our best years yet of funding world-class medical research.

\$4,023,459

Awarded in 2017

This is our 3rd highest total ever in a year

14 careers supported

For emerging and mid-career researchers

Students, early and mid-career scientists received over \$2,000,000 in scholarships, fellowships and awards

\$21,200,000

Requests for funding in 2017

There are many worthy requests for funding that we simply cannot support.

Personal Connections

... One anonymous donor felt so strongly about seeing change in his lifetime, his living legacy has now funded almost \$950,000 in cancer and Parkinson's disease research.

...A family from Tauranga was personally touched by melanoma and now funds fellowships and projects every year to find a cure.

Dr Christopher Lear

Recipient of the Barbara Basham Doctoral Scholarship, Completed in 2017

"Knowing there are people personally willing to support researchers like me and our work makes me very grateful."

Dr Shirley Tonkin OBE

Her medical and research career spanned over 60 years. She reduced cot death in New Zealand by 60% with her research findings published in the 1980s.

Her generous bequest ensures that life-saving research into infant health will continue now and into the future.

Your generosity honours the legacy of scientists and clinicians who have devoted their careers to improving our health and quality of life.

Thank you for investing in our researchers, and the futures of all New Zealanders.

2018 and beyond

Your unmatched philanthropy brought much needed stability to the careers of many young scientists.

Looking forward, there is so much potential for the future of research, because of people like you.

We're so glad you've been a part of it.

Your input is always gratefully received. What research is important to you? What gaps in the field can we help to fill, together?

Researchers love to share their passion, and we can help bring them to your club, village, or workplace. What a great way to share your impact.
