Research*

Tuesday, 2 July 2019

1:00 - 2:30 pm

AMRF Auditorium

**Faculty of Medical & Health Sciences
University of Auckland**

85 Park Road, Grafton

Hear from experts about the latest advancements in brain research and where neuroscience is headed in the future.

About the Speakers

Dr Brigid Ryan
Centre for Brain Research

Dr Ryan works with generations of a family suffering from early onset dementia in the hope of finding ways to improve diagnosis and provide more effective treatments.

Dr Peter Freestone
Dept of Physiology

Dr Freestone is pioneering technologies to literally highlight individual neurons in the brain that can be stimulated to counteract the symptoms of Parkinson's disease.

Auckland Medical
Research Foundation
